

The main title 'HARMONY IN ASSET RECOVERY' is written in a large, bold, sans-serif font. 'HARMONY' is in green, while 'IN ASSET RECOVERY' is in white. The background of the top half of the page is a photograph of a man in a server room looking at a tablet, with a dense array of blue network cables in the foreground.

When IT equipment is no longer viable in its current environment, CTRL+V can maximize the value of your decommissioned IT assets by orchestrating project-based or ongoing asset recovery, recycling, remarketing and disposal compliance.

CTRL+V's full-service asset recovery solution minimizes your risk and increases your company's value. We coordinate, audit, decommission, transport, and process your defective or depreciated IT assets with full audit trails, chain of custody and detailed documentation.

Our IT professionals are experts in the latest data security needs, recycling restrictions and environmental guidelines, and will ensure your asset recovery is in full compliance with applicable laws and regulations. We will utilize our extensive vendor network to secure the highest resale value of your retired equipment, further offsetting your costs. Our comprehensive services span all OEM equipment, minimizing the administrative burden, cost and risks inherent in asset recovery.

Asset recovery projects can be expanded to include additional CTRL+V services such as relocations, data destruction, equipment audits, SmartHands, and many others.

Asset Recovery Services

- Identify and/or maintain asset records for current equipment in your environment
- Determine the planned utilization of this equipment in your environment
- Design a decommission or replacement roadmap for all equipment
- Handle sensitive media according to your security protocols and provide certificates of destruction
- Evaluate internal vs. market value for decommissioned equipment
- Supply final disposition of each item along with a full audit list
- Certificates of recycling and disposal provided for assets removed from site

Why choose CTRL+V?

- Minimize costs and maximize ROI
- Asset recovery anywhere in the world
- Compliance with all environmental and security laws
- Well documented and transparent processes
- Certified and highly skilled project and technical staff
- Single knowledge point throughout project lifecycle
- Flexible contracts and service packages
- Commitment to 100% customer satisfaction
