

# HARMONY IN DATA DESTRUCTION

**The growing threat of data breaches, coupled with increasingly stringent privacy and compliance regulations, have resulted in the need for companies to proactively implement a robust asset disposal and data management strategy.**

CTRL+V's comprehensive data disposal services enable you to safely and securely destroy and dispose of media and devices containing sensitive information. When IT equipment has reached end-of-life, CTRL+V can help you liquidate your assets that contain sensitive data, effectively eliminating your risk. Our IT professionals are experts in the latest data security protocols, recycling restrictions and environmental guidelines, and will ensure your IT disposal is in full compliance with applicable laws and regulations.

CTRL+V offers fully customizable data and media destruction services that fit the security protocols of any business, large or small. All disposal methods can be performed either on-site at the customer's location or off-premises at a CTRL+V-certified facility. We will provide certificates of disposal, destruction and/or chain of custody, as relevant.

**Data Destruction projects can be expanded to include asset recovery options such as asset reuse, asset refurbishment, parts recovery or asset recycling.**

## Data Destruction Services

- Certified secure Data Destruction by degaussing or physical destruction (shredding, crushing, or drilling)
- Software data elimination and sanitization
- Decommissioning of magnetic, optical, or solid-state drives
- Suitable for end-of-life equipment scheduled for decommissioning, lease expiration equipment, and legacy equipment in storage awaiting final disposition
- Brokerage of equipment with 3rd party resellers
- E-waste recycling and disposal at environmentally-responsible recycle centers

## Why choose CTRL+V?

- Reduced costs of IT decommissioning
- Save valuable time by working with a single trusted supplier
- Compliance with all environmental and security laws
- Fully documented and transparent processes
- Certified and highly skilled IT staff
- Flexible contracts and service
