

HARMONY IN INFRASTRUCTURE AUDITS

Maintaining an accurate inventory of IT assets is especially challenging for businesses that have equipment located across multiple offices in different geographies. CTRL+V's experienced professionals can accurately obtain comprehensive, up-to-date fixed asset inventory data by conducting onsite physical inventory services in any environment.

CTRL+V's expertise in physical asset audits includes complex projects – spanning hundreds of worldwide locations and thousands of assets – to small projects covering a few hundred assets at a single location. Whether large or small, our meticulous preparation, careful planning, open communication and ability to adapt delivers an IT Infrastructure Audit that is accurate, comprehensive and meets your standards.

Inventory audits can be expanded to include additional CTRL+V services such as relocations, SmartHands, and many others.

Inventory Audit Services

Discovery – an open discussion of your inventory goals and expectations

Pre-Inventory – preparation and development of a detailed strategy based on your needs

Inventory & Accuracy Validation – execution of devised plan with validation checkpoints

Post-Event Assessment – comprehensive review of the audit results and recommendations
