

HARMONY IN SMARTHANDS SERVICES

CTRL+V's on-demand or SLA/subscription-based SmartHands services ensure that your critical systems are managed by IT experts, alleviating the pressure on your staff and allowing them to focus on the more strategic areas of your operations.

Our SmartHands engineers act as an extension of your IT team; they perform expert technical tasks on site when needed so your personnel can remotely manage equipment across multiple locations. CTRL+V's certified technical specialists provide front-end and back-end support, performing the day-to-day tasks that keep your systems running efficiently. Our SmartHands staff augmentation services can be contracted on a project or SLA basis and can be provided in more than 90 countries around the world.
