

USE CASE:

OFFICE SHUTDOWNS

Over the past few years, CTRL+V has taken part in office and data center IT equipment consolidations in the healthcare, insurance, hospitality, and finance sectors.

These projects varied from co-working facilities in a shared space to wholly-owned buildings spanning several floors. Throughout the engagement, client-specific requirements – ranging from site access, equipment availability, staging locations, and hand-off points – were documented, clarified, and executed according to an agreed upon standard.

Full documentation in the form of photos of the cleared-out areas, chain of custody for sensitive data requirements, certificates of recycling and destruction for media and assets, and client project sign-off meetings were provided upon the completion of each engagement.

AVAILABLE SERVICES

- Pre-project site survey and physical audit of equipment and infrastructure
- Fully documented closure/consolidation solution designed to meet the specific needs of the de-install and removal of assets in compliance with any environment
- CTRL+V provided materials with an option to ensure each workstation remains bundled with all peripherals for re-deployment
- Certified secure data destruction by degaussing, physical destruction, and/or software data elimination and sanitization
- Disposition sorting for owned equipment intended for recycling/resale, lease expiration returned to vendor, and storage of re-usable assets
- Determination of resale value for eligible assets on the secondary market
- Certified e-waste disposals at environmentally-compliant processing center

WHY CTRL+V?

When an office closure or consolidation is necessary, make sure it's executed correctly with tight collaboration and expert orchestration. From preliminary planning discussions through logistics and final execution of the project, CTRL+V's team of certified project managers, specially trained engineers, proprietary technologies and robust toolsets add value at every stage of the project.

No matter if the shutdown/consolidation project encompasses a 10-person shared environment or a 10-floor dedicated building, centralized knowledge and proven methodologies allow CTRL+V to provide customers with a seamless and stress-free experience in short time frames.

- Management of complex multi-site, global engagements
- Single knowledge point throughout project lifecycle
- PMP-certified, dedicated project managers
- Proven methodologies and centralized knowledge base
- Global capabilities
- Flexible contracts and service packages
- Commitment to 100% customer satisfaction
